---

1. (True/False) The Sum of Squared Errors (SSE) can be used to select the best-fitting regression model.   `1 / 1 point`

   ⦿ True

   > Correct! You can find more information in the *Introduction to Linear Regression (Part 2)* lesson.

   ◯ False

2. (True/False) The R-squared value from estimating a linear regression model will almost always increase if more features are added.   `1 / 1 point`

   ⦿ True

   > Correct! You can find more information in the *Introduction to Linear Regression (Part2)* lesson.

   ◯ False

3. (True/False) The Total Sum of Squares (TSS) can be used to select the best-fitting regression model.   `1 / 1 point`

   ◯ True

   ⦿ False

   > Incorrect. Please review the *Introduction to Linear Regression (Part2)* lesson.
